

Tips to drive safely in construction

Pay attention

It is very important to pay attention while driving in construction. You are more likely to have to stop at random times while driving construction. Make sure you are watching both the road and the signs around you.

Keep your distance from other cars

With random stops it is important to have enough room between you and the cars around you.

Slow down

When driving in construction it is important to slow down and keep your eye out for construction workers. With all of the unexpected, it is important to stay with the speed of traffic

Stay off your phone

Phones are a distraction and can cause serious problems when driving. It is extra important to stay engaged and off your phone when driving in construction.
